CodeBlooded.io

MedCare

One stop health care platform.

There are various medical facilities available for the people all across the country. But the people are not aware of these facilities. Migration, unawareness and unavailability of a firm platform to provide such information are the reasons for this problem. Eligible people are unaware of govt schemes for availing medical facilities.

AVAILIBILITY AWARENESS ACCESSIBILITY

Proposed Solution

Central Idea

Android application which will serve as a platform holding access to all the Healthcare domain related queries of the users.

Search based resuts of facilities

The app will have various Filters to search hospitals, ambulance, pharmacies, Diagnostic labs, Blood Banks etc

Knowledge of Government based schemes

The app will have a special feature where the users will be able to gain information of all the Healthcare schemes issued by the government of India.

Additional Features

WE PLAN TO CREATE A WHOLESOME PRODUCT.

- Admin side website.
- Well trained chatbot.
- Women care unit.
- Quick and easy first aid kit.
- Latest news related to medical sector.
- Multi Lingual.
- Medicine Reminder
- Information related to govt. health camps
- Appointment booking , history and prescriptions maintenance.
- Emergency SOS
- User Friendly UI

Timeline of Team

HOW WE PLAN TO WORK

Day 1

Prototype creation and working on coding of front end of the proposed solution.
Major work and completion of UI.

Day 2

Major working on coding of filter based features.
(Hospitals, blood banks, diagnostic labs, schemes, pharmacy)

Day 3

Continue coding.
Working on additional features.
Testing, debugging, improvisation.

Result Day

Awaiting for the results positively.
